DECLARATION

Object: **DIRECTIVE 2002/95 of the European Parliament and of the Council of 27/01/2003 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (ROHS)**

With regard to the forthcoming entry into force of the European directive in question, we inform you that we are already able to provide **ROHS COMPLIANT** printed circuit boards that do not, therefore, contain any of the materials indicated by the regulation.

In fact not only the (laminare and Solder resist) materials used for production but also the surface processes comply with the legislation. Our society has chosen to use **HAL solder (with alloy SnCu0.7% Ni)** for its production cycle. All other processes compliant with the legislation shall be carried out externally.

Best regards

C.T.B. SNC

Dr. Roberta Tonini
